

CMP213 Addendum to Final Modification Report

Connection and Use of System Code
(CUSC)

CMP213 Project TransmiT TNUoS Developments

Costs

Published on: 14th August 2013

About this document

This document is an addendum to the CMP213 Final CUSC Modification Report which was sent to the Authority on 14 June 2013. This report can be found at <http://www.nationalgrid.com/uk/Electricity/Codes/systemcode/amendments/currentamendmentproposals/>

Costs

The high level industry cost of a CUSC Modification Proposal is usually included in the Final Modification Report in order to recognise the level of industry engagement associated with progressing a modification. The costs associated with CMP213 are detailed below. However, it is important to note that these costs do not include any Code Administrator costs for hosting meetings / workshops, preparing the reports, or the cost of any externally commissioned work or any internal impact assessments carried out by National Grid.

Code Administration Costs	
Resource costs	£108,900 - 30 Workgroup meetings £3276 - Catering
Total Code Administrator costs	£112,176
