Reference: CMP219 Self-Governance Statement

Dear Abid,

This is the CUSC Modifications Panel's Self-governance Statement to the Authority for CUSC Modification Proposal CMP219 (CMP192 Post Implementation Clarifications). National Grid has prepared this Self-governance Statement on behalf of the CUSC Modifications Panel and submits it to you in accordance with CUSC Section 8.25.1.

On 31 May 2013 the CUSC Modifications Panel considered CMP219 and agreed that it meets the Self-governance criteria.

As such, CMP219 is unlikely to discriminate between different classes of CUSC Parties and is unlikely to have a material effect on:

- i) Existing or future electricity customers;
- ii) Competition in the generation, distribution, or supply of electricity or any commercial activities connected with the generation, distribution or supply of electricity,
- iii) The operation of the National Electricity Transmission System
- iv) Matters relating to sustainable development, safety or security of supply, or the management of market or network emergencies
- v) The CUSC's governance procedures or the CUSC's modification procedures

The CUSC Modifications Panel believe that whilst there is the potential for materiality in the Proposal, these issues were the intention of CMP192 and therefore CMP219 is not introducing any new material issues, but instead correcting the omissions in the legal text of CMP192. It was agreed that this should be discussed further by a Workgroup.

The proposed timetable for the progression of CMP219 is as follows:

31 May	Proposal presented to CUSC Panel
