

## CMP268 'Recognition of sharing by Conventional Carbon plant of Not-Shared Year-Round circuits'

CUSC Panel – 20 June 2017  
Code Governance Team

## Background

---

- CMP268 was raised by SSE and was submitted to the CUSC Modifications Panel for their consideration on the 27 July 2016.
- CMP268 aims to change the charging methodology to more appropriately recognise that the different types of “Conventional” generation pays. The change to the charging methodology would take the form that for generators which are classed as Conventional Carbon, the generator’s ALF should be applied to both its Not-Shared Year-Round as well as its Shared Year-Round tariff elements.
- CMP268 was proposed as **urgent**. The Authority **granted urgency** on the 23 August 2016. The CUSC Panel Chair wrote to the Authority with an urgent timetable outlined on the 26 August 2016.
- The modification was sent back by the Authority on the **2 December 2016**

## Send back Workgroup conclusions

---

- The Authority sent back the modification on the **2 December 2016** and specified that the following be completed:
  - (a) Consider evidence already submitted and whether any additional evidence would be required for the Panel and the Authority to properly consider the merits of the proposal. ***This can be found in Section 2 of the send back section and annex 1 & 2.***
  - (b) The Final Modification Report to consider in more depth the impacts of the modification when compared with maintaining the current system. ***This can be found in section 3 of the send back section.***
  - (c) The Workgroup to consider whether further consultation on the proposals and evidence is required (see next slide)

## Workgroup Consultation and WACMs

---

- The Workgroup considered, as required under the send back letter, whether a Workgroup Consultation should be carried out. They concluded that this was not required. They considered that a Code Administrator Consultation would be sufficient due to the fact that the Workgroup considered CMP213 in more depth and concluded that there would be no change in the outcome of this analysis.
- No WACMs were raised by the Workgroup in either the Original or send back process (as recommended by the Panel during the send back process)

## Proposed CUSC Modification

---

- This Proposal seeks to amend;
  - Changes to Section 14 – Charging Methodology.

## Next Steps

---

- The Panel are invited to:
  - Accept the Workgroup Report
  - Agree for CMP268 to progress to Code Administrator Consultation for 5 working days opening today (20 June 2017)
- The Code Administrator suggests adding a front page to the Consultation highlighting the two views in the Workgroup and outlining the fact that there are two reports, what work has been carried out etc.

## Proposed Timetable

---

20 June 2017	Present Workgroup Report at CUSC Modifications Panel
20 June 2017	Code-Administrator Consultation published
27 June 2017	Deadline for responses
28 June 2017	Draft FMR published
29 June 2017	Deadline for comments
28 June 2017	Draft FMR issued to CUSC Panel
30 June 2017	CUSC Panel Recommendation vote
7 July 2017	Final CUSC Modification Report submitted to Authority
