2 Panel Recommendation

CMP268 'Recognition of sharing by Conventional Carbon plant of Not-Shared Year-Round circuits'. CMP268 proposes to change the charging methodology to more appropriately recognise of the impact of "Conventional Carbon" generation on transmission network investment costs in areas with low diversity of generation ideally ahead of the December 2016 Capacity Auction.'

The Panel voted on CMP268 against the Applicable CUSC Charging Objectives. One Panel member abstained from the Panel vote.

The Panel view was split for both Vote 1 and Vote 2 (did the Original facilitate the Applicable CUSC Charging Objectives better than the Baseline and which option was considered to be the best) There was **not** a majority support for this Proposal.
