

STC – Common SIF & LARF Methodology

Richard Smith

STC 27th September 2017

Introduction

- CUSC User Commitment Methodology uses two factors which require data from TOs
 - Local Asset Re-use Factor (LARF)
 - Strategic Investment Factor (SIF) – Data required Secured Capability
- Concern expressed by SSEN that there may be variances in how each TO calculates these factors
- Desire to establish a common methodology for all TOs

Engagement

- Three Workshops to date – 1st 28th July 2017
 - NGESO
 - NGETO
 - SSEN -TO
 - SPEN –TO
- Draft Methodology developed by NG
- Methodology discussed and supported by SSEN & SPEN
- Latest version circulated to STC

Proposal

- CUSC is clear and no proposals to change
- Agree methodology with all TOs
- Methodology to be formalised in a STCP
 - NGETO to use same methodology ahead of business separation
- STCP proposal to November STC Panel.
